

Portable Poly Bag Quick Clamping Device w/Scale

B.E.S.T., Inc. offers an air-cylinder operated quick clamp assembly, for holding poly bags in position during the filling and weighing process. Model PBC-50 shown below.

Poly bags from one to 50 pounds net weight are held in position while being filled by a screw feeder or vibratory feeder.

The clamp is signalled by a foot switch. The entire assembly is mounted on an electronic 24-inch square scale platform. The bag support is easily adjustable for varying heights up to 20 inches tall.

The in-feed spout is supplied in 304 stainless steel. The entire assembly is easily moved via fork truck as pockets for the forks are built into the base.
